Commit and Breakthrough!

What is it that allows one person to become easily successful in life, while others struggle all the way. What is it that allows one to take a risk, change a job, re-locate or invest. What inspires someone to dive in and save a stranger from drowning.

I believe there are two things all successful people all have in common. They understand two very powerful keys that enable all of us to achieve personal success. It is these two key factors that allow hundreds of people to walk over burning hot coals without burning, or bend steel re-bar with their throat!

The two keys are, Acting in spite of fear AND 100% Commitment- Body, Mind and Soul! (If we all waited for the fear to be gone before we acted, most of us would not even get out of bed.)

All fear is the same, and all fear is a debilitating disease. When you realize that all fear is the same and it is simply the triggers that are individual to our daily experience you open a door to a new world of possibility limited only by your own imagination.

Do you commit, but 'with conditions'? Are you waiting for the right people, right offer, right weather etc.

Ask yourself, how badly do you want it? When you are truly ready to commit yourself 100%, you WILL create what ever you want in life! It is the difference between if something will happen and When something will happen.

The practice of Fire Walking, Glass Walking, or any other Transformational Breakthrough are one of the fastest ways to understand and master these two keys. To take your first step onto the coal bed IS to act in spite of fear with 100% commitment, an experience that you will remember and draw on for the rest of your life.
